

Strengthening evidence-based support for families

Leveraging AI to Scale Skill Development and Improve Outcomes

Child welfare agencies are often understaffed and overburdened, resulting in systemic challenges to providing high-quality training and monitoring fidelity to evidence-based practices. Our solution equips frontline child welfare teams with cost-effective, on-demand learning with real-time feedback, supporting their professional growth while they deliver critical services.

With Lyssn, Child Welfare Agencies Can:

Continuously Monitor Quality

Train and Support Staff

Document and report progress

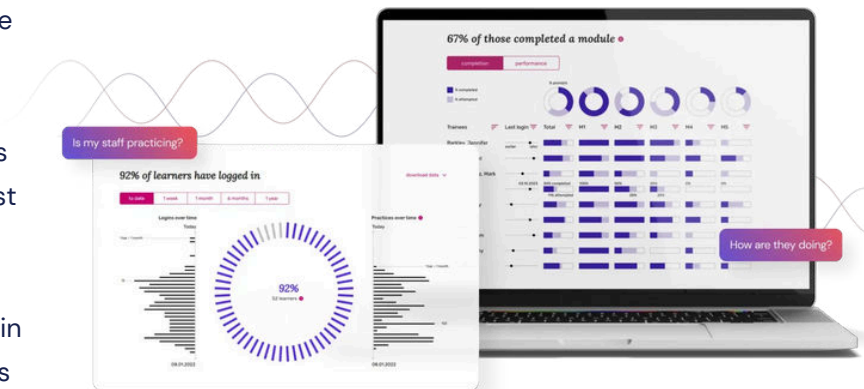

Improve Engagement

Assess All Skill Levels

AI Rooted in Real-World Data, Not Just Theory.

We're passionate about keeping the **human** at the center health and human services. That's why we built the only clinically-validated AI, with the proven accuracy of an expert evaluator, that does precisely that. Our algorithms are trained on a vast dataset comprising thousands of hours of real-world clinical, social services, and crisis conversations, ensuring specificity and accuracy in line with gold-standard fidelity frameworks across the healthcare ecosystem.

All-Inclusive Tools *for Improving Outcomes for Families*

Lyssn's platform includes modules & feedback for Motivational Interviewing, Trauma-Informed Care, Suicide Prevention, and more.

Quality Improvement

Our AI models provide over 75 metrics, ranging from general evaluations of empathy and active listening to measuring the outcomes of evidence-based practices. Evaluations are consistent, personalized to the provider, and enhance dialogues with supervisors with more data and context.

Learn & Practice

Our modules are developed and taught by leading practitioners of various evidence-based practices. To accelerate learning, users practice with simulated client scenarios and receive immediate, detailed, data-driven feedback on their responses.

Hear from Our Clients

Lyssn is helping Minnesota child welfare agencies address the challenge of finding a fidelity monitoring tool that will support the ongoing implementation of Motivational Interviewing (MI). Ideally, the tool will ensure that federal FFPSA continuous quality improvement and fidelity monitoring requirements are met.

— Saint Louis County, Minnesota

Who We Are

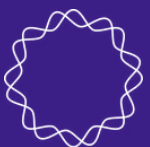

Founded by clinical research psychologists and behavioral health-focused data scientists, Lyssn is transforming how child welfare agencies implement and evaluate fidelity to evidence-based practices, efficiently train their staff on critical skills, and close competency gaps.

Security you can trust.
Peace of mind you can feel.

Lyssn is HIPAA, FERPA, and GDPR compliant. All data is securely stored in the cloud and we meet stringent compliance regulations through encrypted data transfers and storage, two-factor authentication, constant system monitoring, and regular external HIPAA and SOC 2 compliance audits.

AI that provides child welfare agencies with *peace of mind*, engineered by professionals who have been there.
